The product is stabilized by tocopherol (approx. 10 mg of DL-alpha-Tocopherol per Mio IU).

The product meets the specifications of the following monographs:

- "Vitamin A Concentrate (Oily Form), synthetic" of Ph. Eur.
- "Vitamin A" of USP/NF

Solubility:

Miscible with hydrocarbons, ethers, fats and oils. The solvent should contain no peroxides. Insoluble in water. It is necessary to use a solubilizer in aqueous alcoholic preparations.

1 International unit (IU) can be converted into weight with the following equations:

1 IU = 0.55 ug Vitamin A Palmitate

Stability and storage:

Vitamin A Esters are sensitive to air, light, moisture and heat. Opened original containers should be flushed with an inert gas and used up quickly. Prior to use, the product must be heated to 40°C in the unopened container and homogenized.
